SUMMARY

CS student who builds full-stack projects solo – backend, database, deployment, all of it. Comfortable picking up a rough problem and shipping something that actually works in production, not just on my machine.

EDUCATION

Chandigarh Engineering College — I.K. Gujral Punjab Technical University **2023 – 2027***
Bachelor of Technology in Computer Science Engineering - CGPA: 8.3 SAS Nagar, Mohali, Punjab

Pragya Bharti Public School **2021 – 2023**
Senior Secondary Education (Class XII) - 79.4% Alipur, Manpur, Gaya, Bihar

Pragya Bharti Public School **2020 – 2021**
Secondary Education (Class X) - 93.6% Alipur, Manpur, Gaya, Bihar

COURSEWORK / SKILLS

- Data Structures & Algorithms
- DBMS and SQL
- Object-Oriented Programming
- Operating System
- Software Engineering
- Web Development
- SDLC and Agile
- Basic Supply Chain Concepts

PROJECTS

DriveHub - Inventory Management System | *Python, FastAPI, PostgreSQL, HTML/CSS, Git* [Live Link](#)

- Designed a relational PostgreSQL schema and wrote indexed SQL queries powering a 4-parameter search/filter API (maker, model, category, price range) over the vehicle inventory dataset.
- Engineered a full CRUD REST API secured with JWT-based, 2-tier role authentication (user/admin) and bcrypt password hashing, validated by 93% pytest coverage across the FastAPI backend, with all endpoints self-documented via FastAPI's auto-generated OpenAPI/Swagger UI.
- Deployed a 3-service cloud architecture – PostgreSQL on Neon, API on Render, React frontend on Vercel – while directing an AI coding agent under review checkpoints and retaining full ownership of query and architecture decisions.

CustomBix - Test Generator & Data Pipeline | *JavaScript, Node.js, Express, Cheerio* [Live Link](#)

- Architected a scraping and structuring pipeline across 4 subject areas (Quantitative Aptitude, Logical Reasoning, Verbal Ability, Computer Science), using worker_threads to parallelize CPU-bound parsing without blocking the main event loop.
- Engineered a caching layer (1-hour TTL via node-cache) with upstream request coalescing to deduplicate concurrent identical requests, reducing redundant load on the source server.
- Hardened the pipeline with production resilience controls: a circuit breaker that trips after 5 consecutive upstream failures (60s cooldown) and a concurrency queue capped at 50 requests (HTTP 503 on overflow).

TECHNICAL SKILLS

Programming: C++, Python, SQL, JavaScript

SQL / Databases: MySQL, PostgreSQL, Supabase, Query Writing

Technologies: REST APIs, JWT, Node.js, Express, SaaS

Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, SDLC

AI / LLM: Prompt Engineering, LLM APIs, Tool Calling

Tools: Git, GitHub, VS Code

EXTRACURRICULAR

TRYST, IIT Delhi | *Campus Ambassador (Remote)* **2024**
• Promoted a national-level technical festival by collaborating with campus teams on student registrations and outreach.

Techniche, IIT Guwahati | *Campus Ambassador (Remote)* **2025**
• Led student outreach campaigns and coordinated participant onboarding across campus communities.

Parivartan 2025 | *Main Head, Technical Events (On-Campus)* **2025**
• Led the technical events team and organized Ideathon with 300+ participants, collaborating with volunteers and cross-functional teams on event execution.

CERTIFICATIONS

- HackerRank: SQL (Intermediate)
- Infosys: HTML, CSS, JavaScript
- Deloitte: Data Analytics
