EDUCATION

Chandigarh Engineering College, Landran

2023 – 2027*

Bachelor of Technology in Computer Science Engineering - **CGPA: 8.3**

SAS Nagar, Mohali, Punjab

Pragya Bharti Public School

2021 – 2023

Senior Secondary Education (Class XII) - **79.4%**

Alipur, Manpur, Gaya, Bihar

Pragya Bharti Public School

2020 – 2021

Secondary Education (Class X) - **93.6%**

Alipur, Manpur, Gaya, Bihar

COURSEWORK / SKILLS

- Data Structures & Algorithms
- DBMS and SQL
- Object-Oriented Programming
- Operating System
- Software Engineering
- Web Development
- SDLC and Agile

PROJECTS

Car Dealership Inventory System – Full-Stack TDD Kata | *Python, FastAPI, PostgreSQL, React, Pytest, Git*

- Built a full-stack inventory management system using strict test-driven development, achieving 93% pytest coverage on a FastAPI + PostgreSQL backend.
- Deployed a multi-tier application across cloud services – PostgreSQL on Neon, API on Render, and React frontend on Vercel – handling environment configuration and service connectivity.
- Specified intent prompts for an AI coding agent under explicit review checkpoints, validating generated code for correctness while retaining ownership of architecture decisions.

MediFly – Emergency Medicine Delivery Platform | *React, Node.js, Express, PostgreSQL (Supabase), Socket.io, JWT*

- Architected a real-time emergency healthcare delivery platform (React 19, Node.js/Express, PostgreSQL on Supabase) with role-based portals for Patients, Pharmacists, Delivery Riders, and Admins, in a 2-member team over 3 months.
- Engineered a GIN trigram-indexed PostgreSQL search engine (pg_trgm) across a 254,000+ medicine dataset and 11,850+ chemical salt compositions, achieving sub-millisecond query response with estimated-count caching.
- Built real-time order tracking with Socket.io and JWT auth, plus a pharmacist workstation for prescription verification and automated subscription refills.

CustomBix – Automated Test Generator | *HTML/CSS, Cheerio, Worker Threads*

- Built a scraping and PDF-generation pipeline using worker_threads to parallelize CPU-bound parsing without blocking the main event loop.
- Implemented a circuit-breaker resilience pattern in WAL mode to gracefully handle upstream failures and safe concurrent access.

TECHNICAL SKILLS

Programming: Java, Python, C++, SQL, JavaScript

Technologies: REST APIs, JWT, Node.js, Express, Socket.io

Databases: PostgreSQL, Supabase

Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, SDLC

AI / LLM: Prompt Engineering, LLM APIs, Tool Calling

Tools: Git, GitHub, VS Code, Excel

EXTRACURRICULAR

TRYST, IIT Delhi | *Campus Ambassador (Remote)*

2024

- Promoted a national-level technical festival by coordinating student registrations and campus outreach.

Techniche, IIT Guwahati | *Campus Ambassador (Remote)*

2025

- Led student outreach campaigns and coordinated participant onboarding across campus communities.

Parivartan 2025 | *Main Head, Technical Events (On-Campus)*

2025

- Led the technical events team and organized Ideathon with 300+ participants, coordinating volunteers and event execution.

CERTIFICATIONS

- HackerRank: SQL (Intermediate)
- Infosys: HTML, CSS, JavaScript
- Deloitte: Data Analytics
